

Jose Javier Bracho

FULL STACK SOFTWARE ENGINEER

Profile

Full-Stack Software Engineer with 5+ years of experience building **data-driven web applications** that support **operational decision-making**. Experienced in developing clean, intuitive interfaces and reliable backend services using **React, TypeScript, REST APIs, and relational databases**, with a strong focus on clarity, performance, and usability when working with **complex datasets**.

Comfortable collaborating with cross-functional teams to translate real-world needs into scalable software that helps teams move faster and make better decisions.

Employment History

Software Engineer, Expa, LLC, Los Angeles, CA

MAR 2025 – PRESENT

- Designed and built data-driven, full-stack web applications using **React, Next.js (App Router), and TypeScript**, supporting complex internal workflows.
- Developed **REST-style backend services and server-side logic**, handling validation, authorization, and error management.
- Designed and maintained **relational database schemas and SQL queries** using **PostgreSQL** and an **ORM**, supporting **analytics and reporting** use cases.
- Built **clean, intuitive user interfaces** with strong attention to **UI/UX and data clarity**, enabling users to interpret complex datasets efficiently.
- Maintained **code quality, testing, and production reliability** through **Git-based workflows, CI/CD pipelines, and cloud deployments**.
- Collaborated cross-functionally with **product, design, and engineering teams**, supporting a platform used by **40+ active users** and translating user feedback into **iterative product and feature improvements**.

Software Platform Developer, Openscreen, Toronto, ON

APR 2021 – MAR 2025

- Developed **data-driven web applications** using **React**, consuming **REST APIs** to support **interactive, data-rich user interfaces**.
- Built **clean, reusable UI components** with attention to **usability, accessibility, and visual consistency**.
- Implemented **client-side state management** to support complex application flows and shared data.
- Collaborated with designers and product stakeholders to translate requirements into **polished, production-ready interfaces**.
- Optimized frontend performance for large datasets using **component and rendering optimizations**.
- Worked within **Agile teams**, contributing to code reviews, version control workflows, and iterative feature delivery.

Education

MSc Automotive Engineering, Oxford Brookes University, Oxford, England

SEPT 2011 – SEPT 2012

BSc Mechanical Engineering, Universidad del Zulia, Maracaibo, Venezuela

MAR 2006 – DEC 2011

Details

Toronto, ON

Skills

TypeScript

JavaScript (ES6+)

React

Next.js

REST APIs

Node.js

SQL & Relational Databases

ORM Data Access

HTML5, CSS3

Tailwind CSS / SASS

TanStack Query

Git & GitHub

CI/CD Pipelines

Automated Testing (Jest, Playwright)

Cloud Platforms (AWS)

Product-Focused Development

Agile / SDLC

Tools & Platforms

VS Code, Cursor

GitHub Actions, CI/CD

PostgreSQL, ORMs, TablePlus

AI-Assisted Development Tools (Claude, Cursor)

AWS (S3, Lambda)

Hobbies

Baseball, Crossfit, Videogames, Movies, Technology, Legos
